

Organic Aromatherapy Toner

Organic Aromatherapy Facial Toner is a unique blend of botanical flowers and essential oils which eliminate dirt and excess oil deposits on the face and neck. This refreshing toner helps to tone and balance whilst leaving the skin glowing and radiant. Uses aromatherapy to uplift your mood and confidence.

The Aromatherapy Facial Toner contains over 60 roses.

One of the main benefits of roses is that it acts as an anti-inflammatory and soothes irritated skin. Some people also use roses as a rich source of antioxidants, which can help strengthen skin cells and regenerate skin tissue. These properties are therefore, beneficial to people with sensitive skin.

Rose essential oil vibrates at a rate of 320MHz. The highest measured frequency of any essential oil. Rose Essential Oil has a beautiful, strong floral and sweet aroma. The vibration frequency of essential oils reflects its bio-energy and it determines its therapeutic value.

In the studies of Aromatherapy we learn essential oils provide benefits as they are inhaled. Many studies show that once inhaled the essential oils are absorbed into the blood stream.

What makes this facial toner so unique is its incorporated benefits of aromatherapy. It helps bring balance and harmony with stimulating and uplifting properties that create a sense of well-being and self-confidence.

DIRECTIONS: Spray lightly onto face or on cotton pad and pat skin gently to enjoy the refreshing rosewater and essential oils. This acts as astringent and will firm and tone the skin.

INGREDIENTS: Organic rose water and essential oils.
