

Organic Nascent Iodine

Iodine is an essential mineral that the body requires for normal function because we do not produce it on our own. Nascent Iodine is a scientific term for atomic iodine. The molecules are broken down to individual atoms, which is the exact form that the body needs to make thyroid hormones. If iodine is not in the atomic form the molecules of iodine first need to be broken down and that of course takes energy. Iodine helps cell membranes to have an increased ability to expel toxins from the cell into the bloodstream; you may unleash enough exiting toxins to make you quite uncomfortable.

Nascent Iodine is a consumable iodine in its atomic form rather than its molecular form. It is an iodine atom that has an incomplete number of electrons. It is paramagnetic. What does this mean? It means that the iodine atoms can hold an electromagnetic charge. Nascent Iodine has a huge energy release when consumed. This "charged" state is held by the atom until diluted in water and consumed, whereby it gradually loses energy over a 2-3 hour time span. During this time, Nascent Iodine is recognized by the body as the same iodine that is produced by the thyroid and is absorbed effortlessly by the body.

All the cells in your body contain and make use of iodine. It is concentrated in the glandular system of your body, with your thyroid containing the highest amount compared to any other organ. Significant amounts are also stockpiled in numerous other areas of the body including the salivary glands, cerebrospinal fluid and the brain, gastric mucosa, choroid plexus, breasts, and ovaries.

The World Health Organization estimates that over 1 billion people across the globe are at risk for iodine deficiency. Some of our clients have noticed additional energy on the first day after taking Nascent Iodine. If you already suffer from an iodine deficiency, you are most likely to notice the effect sooner.

Helps to increase energy levels, nourish the thyroid gland and regulate the body's metabolism. It is a necessary nutrient for overall health and a crucial component of the detoxification process.

Directions: Take 1-3 drops 3x Daily. One drop = 200mcg of iodine. If using for additional energy and general improved health take up 3 drops 3 times daily. Always take on an empty stomach. Most will find that it is important to build up gradually in order to experience the least amount of detoxification symptoms.

Ingredients: Pure 100% iodine and mineral extracts.

SIZE: 30ml

BENEFITS SUMMARY

- Increases energy levels
- Detoxifies the body
- Nourishes the thyroid
- Cleanses the bloodstream
- Regulates the metabolism
- Improves overall health
