

Organic Teeth & Mouth Care

The Organic Teeth and Mouth Care is specially blended with highly active organic minerals, herbs and essential oils. This is a complete care and protection system for sensitive teeth, toothaches, bleeding and swollen gums. The unique organic toothpaste gel provides better care for looking after your gums, teeth and tongue. It is vital to care and keep your mouth free from bacteria and to prevent tooth decay.

This special formulation works very gently, yet effectively to leave your teeth clean and pearly white, whilst also cleaning your tongue and strengthening your gums.

The use of Myrrh is very profound as a wonderful means to care for the body and is an essential herb dating back to biblical days, as it also helps to prevent tooth grinding at night.

It contains resins, organic peppermint and organic minerals, refreshing your mouth and eliminating the coating on your tongue at night. It is of my understanding that if we eliminate the bacteria from our mouth we should then in turn reduce the bacteria in our stomach.

The mouth is the entry point of many germs, thus using this formulation will hinder the possible onset of any threatening bacteria, forbidding its entry into the body.

The formulation works to freshen and protect your mouth, teeth, tongue and gums throughout the entire day. For optimum results, use prior to bed of a night time. This will help to eliminate stubborn stains such as coffee, tea, wine, and smoking by way of preventing bacteria to breed as you sleep.

Directions: Apply a small amount to your toothbrush.

Ingredients: Organic aloe Vera juice, organic Noni juice, organic minerals, organic pawpaw extract, xantham gum, white willow bark, vegetable glycerine, organic cloves oil, organic thyme, organic myrrh, organic lavender, organic wild chrysanthemum, organic peppermint.
