

Organic Tropical Suncare

The Organic Rosehip Tropical Suncare is a rich luxurious blend of cold pressed oils which help to protect your skin against Australia's harsh climate. It is made from organic flowers, herbs, plants and essential oils.

The Organic Rosehip Tropical Suncare will feed the skin, provide moisture and naturally prepare it to cope with the sun. It is a natural 15+ skin protector containing organic raw ingredients known to contain their own UV protection properties.

What is the difference between the Organic Rosehip Tropical Suncare and the Organic Sun Moisturising Cream?

The main difference is the Tropical Suncare is an oil and the Sun Moisturiser is a cream. The Tropical Suncare has a milder fragrance and can be used in the hair as a protective moisturiser against sun damage or drying out in chlorinated water. The Sun Moisturising Cream is slightly more effective at protecting the skin because it contains waxes which help to create a second layer between you and the sun. Both products are fantastic for all skin types and all ages.

Directions: For all skin types. Use before, during and after sun exposure to keep your face and body feeling moisturised and healthy. Apply every 2 hours to moist skin, and more often at first, if skin is not tanned. For hair care, massage through gently before bedtime. Leaves you with healthy hair.

Ingredients: Organic rosehip seed extract, organic sesame oil, natural vitamin E, organic jojoba oil, organic rosewood oil, organic sandalwood, organic rose geranium oil.

SIZE: 125ml
